DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group I and the species of Example I is responsive. Applicant has canceled claim 16, corresponding to Group II. However, the Examiner disagrees with Applicant's statement that all pending claims read on the species. However, Example I does not describe immersing, as in claim 11, the shapes of claims 13-15 nor the uses of claims 19-20. Also, upon further consideration, the last paragraph of each of Examples 1-6 suggests a number of potential uses. Therefore, regardless of the Example chosen, Applicant is required to choose a specifically disclosed use of the Example. To fully respond, Applicant must 1) elect one Example to fulfill the species requirement, and 2) elect a single disclosed use for the elected Example from the last paragraph of the elected Example. If Applicant continues to elect Group I and Example I and maintains that any or all of claims 11, 13-15, and 19-20 (and possibly 21; use as a vapor source in an MBE chamber does not read on claim 21; but use in a sublimation getter pump does) read on the elected species, Applicant should provide reasoning supporting the position. The requirement for the elections of species (as modified) is repeated below.

2. This application contains claims directed to the following patentably distinct species of the claimed invention: the process of Example 1, Example 2, Example 3, Example 4, Example 5, or Example 6. Applicant must also choose a specific use from within the last paragraph of the chosen Example (e.g., for Example 1, use as a vapor source in an MBE chamber or in a sublimation getter pump). Applicant's choices will affect claim limitations relating to the identity of metal A, element B, liquid L, the substrate shape, and the purpose of the coated substrate.

3. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 8-11, 16/1, 16/8, 16/9, 16/10, 16/11, and 18 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

Art Unit: 1762

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. No telephone call was made due to the complexity of the species requirement.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Cleveland whose telephone number is (571) 272-1418. The examiner can normally be reached on Monday-Thursday, 7-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy Meeks can be reached on (571) 272-1423. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
